a. Number of distinct measurement spots in a year, sum over unit and period

b. These unit names only existed in the earliest years and combined, cover the functions of the various crushing and sorting and enrichment units

c. Other includes measurements taken in areas of maintenance, engineering, laboratory, and quality control.

a. Number of distinct measurement spots in a year, sum over unit and period

b. These unit names only existed in the earliest years and combined, cover the functions of the various crushing and sorting and enrichment units

c. Other includes measurements taken in areas of maintenance, engineering, laboratory, and quality control.

Supplementary Table 6: Number of spots and **Geometric** means and range (minimum and maximum) of the monthly-averaged dust concentrations taken by the Mine Rescue in the Uralasbest mine by calendar year period: 1964-2001
